// 00 — WHO WE ARE

ONE PARTNER. FULL PROTECTION.

SECURITY IS NOT A PRODUCT. IT IS A POSTURE.

Ignaris Group protects businesses end to end. We find your weak points before attackers do, watch your systems around the clock, prepare you for the certifications your market demands, and build secure technology when you need it. One team, one plan — and reports you can actually read.

// WHY IGNARIS?

ONE ORGANIZATION TO PROTECT, WATCH, CERTIFY AND BUILD.

Most providers solve one piece of the puzzle. Ignaris brings offensive security, defense, compliance and engineering together in a single team — one complete view of your risk, one coordinated plan of action.

WHAT SETS US APART

- Security and technology under one roof
- Named specialists on your project
- Solutions tailored to your organization
- Reports executives and engineers understand
- Measurable, business-oriented results
- Support before, during and after

RED TEAM & PENETRATION TESTING

MODE

ADVERSARIAL

SCOPE

CYBER+PHYS

Find your weaknesses before an attacker does.

We test your organization the way a real adversary would — digitally and physically. We gather intelligence, plan the operation and run a controlled attack on your systems, facilities and people. You receive a clear report: what we found, what it means for your business, and exactly how to fix it.

WHAT YOU GET

- Lower risk of a successful attack
- A clear map of where you are exposed
- Security spending focused where it matters
- Practical fixes in plain language
- Proof of whether your defenses work

STATUS

ARMED

Someone watching your business, day and night.

Our Security Operations Center watches your systems 24 hours a day, every day of the year. We detect suspicious activity early, investigate it, and act before it interrupts your operations.

WHAT YOU GET

- Threats caught before they spread
- Faster response when something happens
- Less downtime for your business
- Specialists on watch at all hours
- Clear visibility of your systems, always

ISO, SOC 2 & CMMC CONSULTING

OUTPUT

AUDIT-READY

STANDARDS

ISO · SOC2 · CMMC

Turn security into a reason clients choose you.

Many contracts and clients require certifications such as ISO standards, SOC 2 or CMMC. We prepare your organization to meet them: we set up the controls, processes and evidence auditors look for, and guide you through the whole journey. We are consultants — independent auditors issue the certificate; we make sure you arrive ready.

WHAT YOU GET

- More trust from clients and partners
- Access to contracts that require certification
- Simpler, faster audits
- Regulatory and contractual peace of mind
- Stronger internal processes

PRIORITY

QUALITY

Technology built for your business — from hardware to AI, secure from day one.

We design and build complete solutions: hardware, industrial (OT) and office (IT) infrastructure, full networks with intrusion detection, custom software, and autonomous systems powered by AI — tailored to your needs. One team is accountable from first design to final delivery, with security built in from the start.

WHAT YOU GET

- Technology that fits your business goals
- Fewer expensive fixes later
- Systems that are secure and resilient
- One accountable team for the whole project
- Faster delivery and easier growth

BRING US YOUR **HARD** PROBLEM

Whether you need to know how safe you really are, someone to watch your systems, a certification your buyers trust, or technology built right the first time — start with a conversation. We listen, map your goals to the right service, and give you a clear written plan before any work begins.
